

## OBX Universal Platform Solution

OBX is a Platform as a Service (PaaS) IoT/Big Data provider focusing on cloud based wireless solutions for both **interior & exterior** applications. The platform can be applied for many verticals including but not limited to, Commercial & Industrial building management, Smart City, Smart Construction Developments, Universities, Hospitals, Shopping Centers, Airports, Parks & Recreations and Agricultural Industries.

OBX platform uses our OBX Universal Gateway to implement a grid of technology enhanced functions that are connected by an encrypted Wi-Fi mesh network. Our Platform as a Service (PaaS) approach provides an all-encompassing solution suited to our clients' needs that is **hardware, protocol and internet uplink agnostic**. This enables us to use the best of breed sensors, controllers, actuators to perform in the Lighting, HVAC, Energy Monitoring and Management sectors. In addition, our platform can be used to extend Internet connectivity and to provide cloud-based distributed data center products and services.

OBX platform is **interoperable and scalable** which presents one solution for all through a proprietary cloud based control and management interface. OBX platform employs a layered security architecture utilizing a defense in depth model. The security methodology strictly adheres to industry best practices and can be reviewed by third party vulnerability assessments.
